

Petar Plackov, WordPress Developer

Over 6 years of experience in IT as a WordPress Developer

With over three years of professional experience as an HTML coder, I have developed a strong expertise in HTML and CSS. I have a solid understanding of UI/UX design principles and cross-browser compatibility, ensuring that web interfaces are both visually appealing and user-friendly. My skills include creating dynamic CSS/JS animations and working with CSS preprocessors like Sass and Less to write clean and maintainable code.

I am well-versed in optimizing web application performance and have experience using design tools such as Figma, Sketch, and Photoshop to turn design concepts into responsive web pages. My English proficiency at a B2+ level allows me to effectively collaborate with international teams and communicate complex ideas clearly.
